

1911 Government Model

Hi to all,

Attached is a picture of the 1st 4 pistols that we have built. They are now being hand polished in preparation to being Charcoal and Nitre blued. The build doesn't take too long but the hand polishing does. I have a stunning picture of one of the sample pistols but I can't send it out until I have the approval to use it. I will send it out to you as soon as I get permission to use it. The booklet that Walt Kulick wrote the historical background for along with pictures and information on the special part is just about ready. I will include one with each pistol. I am still working on getting the L shaped tool that was originally shipped with each pistol made up. I'll let you know the price as soon as I can. Thanks for your continued patience.

Bill
